WESTERN MEADOWLARK

GENERAL MEETING

Big Bad Birds of the Mojave Desert
7:30 PM Wednesday, March 21, 2018
A presentation by Larry LaPre

Golden eagles, red-tailed hawks and prairie falcons are characteristic birds of the Mojave Desert. They have a well-deserved reputation as top-level predators. Larry will share his experiences with falcon banding, eagle satellite tracking and monitoring of hawk and eagle nests.

Less well known is that Common Ravens are predatory. Their population explosion in the desert and inclination to eat hatchling and

juvenile desert tortoises has caused severe declines in the numbers of this threatened reptile. Larry will describe the extensive nest surveys and dietary studies performed recently and present information on traditional and experimental control efforts to reduce the population of ravens. This can be highly controversial, and other methods which rely on the ravens' native intelligence and communication are underway. These involve the use of drones, lasers, and 3D printers in aversion training.

Larry LaPre joined SBVAS in 1980 and has been compiler for the Santa Ana River Valley Christmas Bird Count for 39 years. He is a past president of our chapter. He has always been a desert biologist and spent the last 18 years of his career working for the Bureau of Land Management as the Desert District biologist.

Please come enjoy what promises to be a wonderfully interesting program.

Everyone is always welcome.

GENERAL MEETING

Birding Nepal – High and Low
7:30 PM Wednesday, April 18, 2018
a presentation by Brian Elliott

Brian Elliott will give a presentation at our April general meeting on his trekking and birding trip to Nepal. Brian and a friend trekked for 20 days on the Makalu Base Camp Trek route into and out of the Makalu Barun Conservation Area in the mountains of eastern Nepal. Elevations on the trek ranged from a low of 2500 foot to a high of 20, 250 foot at Sherpani Col. Birding and species diversity was excellent along the way as the trek passed through lowland tropical forests to rhododendron forest higher up and then finally into the alpine zone at the higher elevations of the Himalaya Mountains. Following the trek, Brian spent four days birding and wildlife viewing at Chitwan National Park in southern Nepal near the Indian border.

Brian is an Audubon member and also very active in Sierra Club. He is an interesting and talented speaker and photographer. He comes highly recommended and shouldn't be missed.

Brian Elliott at Sherpani Col base camp

Everyone is always welcome.
Dori Myers, Programs

SBVAS Wins in Court Against Major Warehouse Project

**Drew Feldmann
Conservation Chair, SBVAS**

The San Bernardino Valley Audubon Society and its allies scored a legal victory on February 8, when Riverside County Superior Court Judge Sharon Waters agreed with many of our objections to this project raised in our lawsuit. This is a fight that has gone on for years and will surely continue. While we have been successful at this stage, final success is by no means guaranteed.

The project, known as the World Logistics Center (WLC), goes back quite a few years and has been a dominant local issue in the San Jacinto Valley. Not counting the environmental impact reports themselves, my computer has 116 documents on this issue going back to 2012.

The WLC would be the largest master-planned warehouse development in U.S. history, totaling approximately 2610 acres, which is over four square miles. Most of the eastern part of the city Moreno Valley would be turned into a complex of warehouses. The warehouses themselves – just the buildings – are projected to cover 46 million square feet, equivalent to 700 football fields. According to a traffic study, the project would cause 14,000 additional truck trips per day. If all these trucks had to pass a single point of entry, there would be one truck every 6 seconds, 24 hours a day, 365 days a year. And all of this would be immediately north of the San Jacinto Wildlife Area, one of the premier Important Bird Areas of global significance in the country.

Given the obvious impacts of noise, nighttime light, air pollution, and other edge effects on the wildlife area, plus the destruction of raptor foraging territory in the project area itself, we joined with the Sierra Club, the Center for Biological Diversity, the Center for Community Action and Environmental Justice, and the Coalition for Clean Air in filing suit against the project under the California Environmental Quality Act (CEQA). We are represented by Earthjustice, which was originally the Sierra Club's legal arm, but it later separated to operate independently. Their tag line, BTW, is "Because the earth needs a good lawyer." Other litigants separately represented include Tom Paulek and Friends of the Northern San Jacinto Valley,

Residents For a Livable Moreno Valley, the Laborers International Union, and the SoCal Environmental Justice Alliance.

A few words about how California Environmental Quality Act works: It basically requires full disclosure of information on 19 subjects related to a project:

- Aesthetic/Visual Resources
- Agricultural Resources
- Air Quality (pollution, global warming, & climate change)
- Archaeological/Historic Resources
- Biological Resources
- Cultural Resources
- Cumulative Impacts
- Energy
- Geologic/Seismic and Soils
- Hazards and Hazardous Materials
- Hydrology, Water Resources, Water Quality
- Land Use and Planning
- Mineral Resources
- Noise
- Population and Housing
- Public Services
- Recreation
- Traffic and Circulation
- Utilities

Note that wildlife concerns per se, "Biological Resources" above, are only one of the nineteen, though all of them must be addressed at least minimally. The intent of the law is that decision-makers of the lead public agency (e.g., a city council, board of supervisors, etc.) be as fully informed as possible before approving a project. The process begins with a formal Notification of Preparation (NOP) of a Draft Environmental Impact Report (DEIR) by the lead agency after conditional preliminary approval of the project by the agency. The public is then invited to comment on issues that must be addressed in the DEIR. In the next step, what is called the Real Party of Interest, meaning the developer, hires a consulting group to compile a Draft Environmental Impact Report (DEIR). These Environmental Impact Reports can easily run to thousands of pages and can cost six or seven figures. After it is released, the public gets a limited amount of time (30-90 days) to comment on any deficiencies in the DEIR. After that, the developer is to address all the issues raised by the comments that were filed, make revisions to the DEIR as needed, and issue a Final Environmental Impact Report (FEIR). The FEIR then goes to the public agency involved to be accepted or rejected.

SBVAS wins in Court, Continued

If it is accepted, the project may proceed. Under CEQA, the people and groups who filed comments may sue to overturn the approval if objections they raised were not adequately addressed.

In this case, the City of Moreno Valley, represented by its City Council, is the lead agency and the Real Party of Interest is a somewhat shadowy firm called Highland Fairview with Mr. Iddo Benzeevi serving as CEO and president. The developer has no publically known source of income but has considerable funds to buy much of the land involved and spends money into six figures at every city election cycle to get favorable members on the city council.

The timeline in this case began when the NOP was issued in February 2012. The DEIR was issued February 2013 and the FEIR was issued in 2015. At each of the comment stages, SBVAS raised concerns about the impacts of the project on the San Jacinto Wildlife Area's bird population and habitat. The FEIR went before the Moreno Valley City Council in August 2015 and was accepted by a vote of 3-2. We and our allies filed suit in September 2015. The case has therefore been in court for 2½ years. Such a timeline is normal for cases like this.

We asked the court to block the project from proceeding until there was an EIR that fully complied with the CEQA by fully addressing the issues that we raised, and we raised quite a few. For example, the FEIR relied on a study by the Health Effects Institute to make a strong claim that new diesel technology would not cause cancer. The Institute later denied that their conclusion was that strong. One of our attorneys, Oscar Espino-Padron of EarthJustice, was quoted as saying "This was an inaccurate misrepresentation that tainted every step of the EIR."

In another example, the developer used the simple fact that the city limits of Moreno Valley extend into the northern portion of the San Jacinto Wildlife Area to make the project seem more eco-friendly. The WLC project was defined by the developer and the city to include this state-owned wildlife area land even though no development could occur there. The developer then called this land a buffer and talked about how a good chunk of the project area was being set aside for wildlife, when in fact it was already set aside under state law.

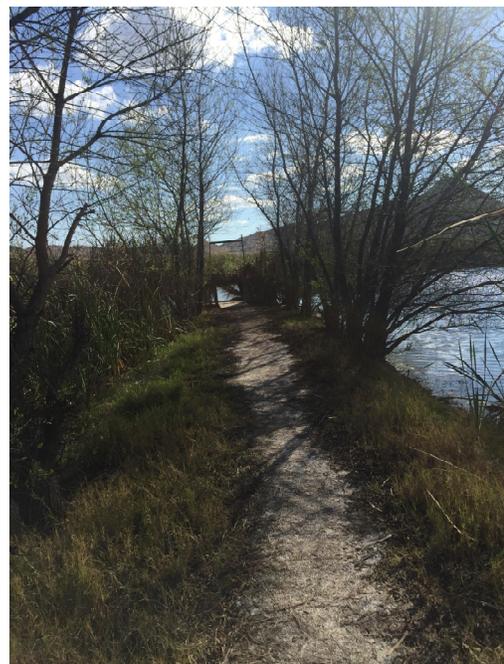

The decision indicates that the issues of agri-

cultural resources, biological resources, cumulative impacts (which will include health impacts), energy, and noise will have to be re-addressed. Much of the objection on biological grounds addressed the supposed buffer, which the judge found to be "misleading." Our side has filed comments on the judge's decision and the developer has until March 22 to file objections, which we fully expect will occur. The process is therefore hardly over. And, if the developer eventually fully satisfies the judge's concerns, it will mean that the EIR is legally valid.

One other disturbing note has to be added about this project and the litigation. A recent California Supreme Court decision held that the California Election Code trumps CEQA in the following way: if a project is presented to an agency as initiative petition, then the agency can adopt it and avoid the entire CEQA-EIR review process. The Moreno Valley City Council did accept such petitions in the fall of 2015, so we and our allies sued to invalidate the petitions on technical and other grounds. We lost in Riverside County Superior Court in a decision by the same judge who ruled in our favor on the CEQA issues earlier this month. That case too is on appeal. If we lose on this aspect, we will likely lose on the CEQA aspect also.

Stayed tuned.

Name That Birding Spot

March/April 2018 Field Trips

Sunday, March 4, 2018 8-10 am Beginning Bird Walk at Fairmount Park, Riverside Dave Woodward (909) 783-2417

For those of you who are just beginning the wonderful pastime of bird watching, please join us for a fun, slow-paced morning of birding in one of our local wildlife habitats. Our goal will be to teach you enough basic birding techniques and identification skills so that you will feel comfortable birding on your own or joining our longer birding trips throughout the year. We will introduce you to some of our local bird species. You may be surprised at what wonderful birds can be seen! Wear comfortable walking shoes, hats and sunscreen and bring binoculars and water. The walk is free and no reservations are needed, however, all participants must sign a liability waiver. You may print one out ahead of time and bring it with you, or the trip leader will have forms available on site. Everyone is welcome.

Saturday, March 10, 2018 - 8:00 am Bolsa Chica & Orange County Coast Dori Myers (714) 779-2201 (h) or (714) 336-1420

Please join us for what should be a great day of birding in the wetland areas of Orange County. Expect to see a large variety of wintering birds including ducks, shorebirds, grebes, herons, egrets, terns, cormorants, etc. We ought to find gulls and raptors and some song birds. With any luck we will see 50 or more species just in the morning. After birding Bolsa Chica (until around noon) we will go to Newport Back Bay or the San Joaquin Wildlife Sanctuary to eat our lunch and finish the day. We will meet at the PCH parking lot of Bolsa Chica at 8:00 am (map). To reach Bolsa Chica, take the 91 freeway south to the 55 (Newport freeway). Continue on the 55 to the 405 and go north towards Long Beach. Exit at Beach Blvd. (south) and continue to Pacific Coast Highway. Turn right and head north on PCH, past Huntington Beach. We will meet in the parking lot of the Ecological Preserve (Bolsa Chica) on the inland side of Pacific Coast Hwy at the signal between Seagate and Warner. Please bring a lunch if you intend to stay for the day. Also bring binoculars, bird book and a scope if you have one. It can get cold along the coast in winter so dress in layers.

Sunday, March 18, 2018 49 Palms Oasis Tom Benson

Join SBVAS for a morning hike in Joshua Tree National Park. This 3-mile round-trip hike has a

moderate 600-foot overall elevation gain (300 feet each direction). We should see Black-throated Sparrows and Rock Wrens, and probably a few (but not many) other birds. If there has been decent winter rain, however, we should encounter a number of wildflowers. And if it's warm enough, we should see Chuckwalla and other species of reptiles on our return hike. If there's been no rain and the weather is cool, well, it should still be a nice hike. Due to the narrowness and popularity of the trail, this trip will be limited to nine participants. Please email Tom (thomasabenson@aol.com) after the date has been determined to reserve a space on this trip. This is a desert hike, so remember to bring an adequate supply of water. Check the weather forecast beforehand and dress and prepare accordingly. For more information regarding the 49 Palms Oasis trail, please visit: <https://www.nps.gov/jotr/planyourvisit/upload/49siteMap.pdf>.

Sunday, April 8, 2018 - 8:00-10:00 am Beginning Bird Walk at San Timoteo Canyon Matt Grube (909) 253-3867

Our goal will be to teach you enough basic birding techniques and identification skills so that you will feel comfortable birding on your own or joining our longer birding trips throughout the year. We will meet at the dirt lot along San Timoteo Canyon Rd just south of Fern Ave at 8 am. The walk is free, and all are invited to join. Expect to walk 2-3 miles on level dirt paths as we look for spring migrants and summer nesting birds. Please contact Matt Grube by email at for questions.

Saturday, April 21, 2018 - 7:00 am Shorebird Migration at the Salton Sea Chet McGaugh (951) 781-3699 and Tony Metcalf (951) 242-7038

Tony Metcalf and Chet McGaugh will be leading back-to-back San Bernardino Valley Audubon Society field trips on the weekend of April 19-20, 2014 - to the north end of the Salton Sea (Saturday) and the San Jacinto Wildlife Area (Sunday). As we both are big fans of the shorebirds, and the date is excellent for a good migration experience, we intend to spend most of the weekend searching mudflats, marshes, slop ponds, wet fields, barnacle beaches, and open sea and sky. It is our hope that we can provide some knowledge about this fascinating bunch of birds, stimulate appreciation and interest in them, and mitigate some of the phobias. And have fun. As usual, the San Bernardino Valley Audubon Society field trips are open to all. We will meet at 7:00 am on Saturday at the "Big Arco" (map) on the corner of 66th Avenue and the 86S Expressway in Mecca. On Sunday will meet at 7:00 am at the San Jacinto Wildlife Area headquarters on Davis Road, a

Continued - Field Trips

a few miles north of Lakeview and the Ramona Expressway. Pick one trip or the other or both. There will be different species seen at the Salton Sea and at the San Jacinto Wildlife Area. The study of shorebirds is greatly enhanced by the use of spotting scopes so we hope there will be plenty besides our own. Though not necessary, we suggest having rubber boots for those hard to get to spots, particularly at the Salton Sea (short wades, slogging through deep mud, barnacles). Bring lunch and snacks and drinks. Weather is likely to be excellent, and there will be many birds to see besides the waders.

**Saturday, April 28, 2018 - 7:00 am
Big Morongo Preserve
Matt Grube (909) 253-3867**

The first week in May is about the best time for observing migrant land birds in Southern California and Big Morongo is one of the best places for it. In addition to migrant warblers, vireos and flycatchers, we expect to see the breeding specialties including Vermilion Flycatcher, Yellow-breasted Chat, Summer Tanager, Blue Grosbeak, Bullock's Oriole and Hooded Oriole. Join us for a morning bird walk on the trails and roads of the preserve and surrounding areas. We will meet at the preserve parking lot at 7:00 am (map). To get there, take I-10 to Highway 62, go north ten miles to Morongo Valley, then turn right on Park Avenue to Covington Park. Turn left at Covington Park, then do a quick right-left-right into the preserve. Weather is typically good this time of year. Bring water, snacks and lunch if you plan to make a day of it. Some of us will probably stay out all day. Who knows where the afternoon will lead us?

Bearpaw Ranch

Bearpaw Ranch is a 70 acre nature sanctuary, op-
erated by the San Bernardino Audubon Society
and may be visited 7 days a week from dawn 'til
dusk by members of Audubon and their guests.
Bearpaw Ranch is nestled on the north slope of
scenic Mill Creek Canyon at 4,500 feet elevation,
surrounded by the towering peaks of the San Ber-
nardino National Forest. To reach Bearpaw Ranch,
take Highway 38 to the Forest Falls turnoff. Go
several car lengths on Valley of the Falls Dr. and
look for our small wooden sign on the right. Our
driveway is on the right, marked 38801. The
driveway is paved and unpaved road that mean-
ders across Mill Creek wash and up the bluff to an
electronically operated entry gate. *Members* who
wish to visit the Sanctuary should call any board
member in advance to get the gate code. It is not
a requirement that the caretaker is at home for
you to visit. If the gate does not open because of
mechanical failure, you are welcome to walk in or
stop for birding along the creek bed.

Bearpaw Sanctuary,
38801 Valley of the Falls Drive
P.O. Box 88; Forest Falls, CA 92339

Bearpaw Sanctuary is on Facebook; message us
with questions and comments. If you type
"Bearpaw Sanctuary" into the SEARCH function,
you'll find us. Bearpaw visitors are encouraged to
report interesting wildlife sightings and share
their favorite nature photos from their Bearpaw
visits.

**Olympic BirdFest 2018
Come Bird With Us
Sequim, Washington, April 13-15,
2018**

amazonsmile
You shop. Amazon gives.

Grab your binoculars and join the 15th annual **Olympic BirdFest 2018** celebration at the Dungeness River Audubon Center, April 13-15, 2018.

Support our local Audubon Chapter by logging into Amazon.com via Amazon Smile.

Click on <https://smile.amazon.com/> And choose San Bernardino County Audubon Society in the list of worthy groups. Amazon.com donates 0.5% of your purchase amount to our chapter!

The stage is set...quiet bays and estuaries, sandy beaches, a five-mile-long sand spit, and a protected island bird sanctuary on the Strait of Juan de Fuca; wetlands, tide pools, rainforests, and lush river valleys. The players are ready ... Marbled Murrelets, Rhinoceros Auklets, Harlequin Ducks, Black Oystercatchers, Peregrine Falcons, Barred and Pygmy Owls will be sporting their finest spring plumage for this celebration. Enjoy guided birding trips, boat tour, and a gala banquet. Our featured speaker this year, Claudio Vidal has been exploring & birding since the age of 12 and currently leads birding/nature tours & photo safaris through Patagonia, Chile & South America.

Come bird with us and experience with others the spectacular landscapes of the Olympic Peninsula ...you just might go home with a new bird for your life list! Check out the offerings by going online (www.olympicbirdfest.org).

Precede your BirdFest weekend with a three-day, two night birding cruise of the spectacular **San Juan Islands** on April 10-12, 2018.

Visit San Juan and Sucia Islands, and more. Stay at the historic Roche Harbor Resort.
